Employee Reviews

Themes

Below we list themes found in reviews. The labels are:

the state

the city

if needed the center name within the city

which kind of review (in this case, all are from Indeed.com)

Then we give the number of the review. These will correspond to the review numbers under the listing of the center location, allowing anyone with access to the website to look up the review itself.

Because one review usually cites more than one problem, many are listed more than once.

These include only reviews that list problems, and leave out positive reviews. A full assessment of employee satisfaction would require a study with a proper stratified random sample, and we are unaware that any such study has been conducted.
